SUSHI DREAMS

The **Omakase Room** at Sushi-san is a new 10-seat omakase experience where master sushi chef Kaze Chan will showcase his inventive Japanese cuisine through an 18-course menu that will include influences from his roots in Vietnam, China and Japan. Products will be impeccably sourced from around the world; the chef's relationship with the Yamasaki family at the Toyosu Fish Market in Tokyo provides the restaurant with the freshest seafood available, with a focus on wild, line-caught fish. The design of the space is reminiscent of a modern Japanese loft, where you will feel like you have been invited to a dinner party at chef Chan's home. Once seated, guests will be encouraged to interact with the chefs at work while they dine; the chefs will have raised custom Hinoki cypress cutting boards so chefs and guests are at eye level with each other. The team worked with local ceramicists and stonemasons to create serving pieces, including a custom-made lazy susan at each seat. Sake, wine, Japanese whiskey and cocktails crafted with hand-chipped ice are also on offer. thematikeroom.com
